## Career Objective

---

A sincere and motivated **2nd-year B.Tech student in Artificial Intelligence & Data Science** seeking **Summer Industrial Training** to gain practical exposure in data handling, content structuring, basic web systems, and analytical problem-solving. Looking to learn professional workflows, documentation practices, and real-world application of data in a structured work environment.

## Skills

---

### Analytical & Practical Skills

- Data organization and basic data interpretation
- Logical reasoning and problem-solving
- Understanding of information flow and user-focused systems
- Ability to follow structured guidelines and processes

### Technical Skills

- **Programming Fundamentals:** Python (basic), C, C++
- **Web Basics:** HTML, CSS, JavaScript (structure and layout understanding)
- **Database:** MySQL (basic data storage and queries)

### Tools

- MS Excel / Google Sheets (basic data entry, sorting, formatting)
- Git & GitHub (basic version control)

## Strengths

---

- Honest learner with strong attention
- Good written communication and documentation ability
- Consistent, disciplined, and reliable in completing tasks
- Able to understand requirements and work accordingly
- Comfortable working independently or in a team

## Project Experience

---

### Academic Project

#### Project Title: Public Transport Information System

- Worked on organizing and presenting information in a clear and usable format
- Assisted in understanding user requirements and system flow
- Applied logical thinking to improve clarity and structure of data
- Collaborated with team members and maintained basic documentation

### Key Learnings

- Importance of accuracy and clarity in information systems
- Structured approach to problem-solving
- Team coordination and responsibility

## Education

---

### **Bachelor of Technology (B.Tech)**

Artificial Intelligence & Data Science

**Arya College of Engineering and IT**

2nd Year

## Additional Information

---

- Interested in roles involving data support, documentation, and analytical tasks
- Open to learning tools and workflows used by the organization
