Professional Summary

Computer Science student building backend systems, automation tools, and AI-driven applications using Python. Experienced in REST APIs, data processing, and IoT-based systems with focus on scalable and practical implementations.

What I Can Deliver

Backend API Development • Python Automation • REST APIs (Flask/FastAPI)
Data Processing (Pandas, NumPy) • Basic ML Models • IoT Integration (ESP32, Arduino)

Technical Skills

Languages: Python, Java, C, C++
Backend: Flask, FastAPI, REST APIs
Data/AI: Pandas, NumPy, Scikit-learn
Databases: MongoDB, PostgreSQL, MySQL
Tools: Git, GitHub
Systems: ESP32, Arduino Uno, Sensors

Projects

Audio-to-Notes Generator

Python, FastAPI, HTML, CSS

- Built backend pipeline to convert speech into structured notes
- Implemented transcription and summarization logic
- Designed REST API for processing user input

Air Quality Monitoring System

ESP32, MQ-135, DHT22

- Built IoT system to monitor environmental parameters
- Processed real-time temperature, humidity, and air quality data
- Streamed sensor output via serial communication

Laptop Price Prediction System

Python, Flask, Scikit-learn

- Built ML model using structured dataset
- Performed preprocessing and feature engineering
- Deployed prediction interface using Flask

Automatic File Organizer

Python

- Developed automation tool to organize files by type
- Implemented rule-based file sorting logic

Experience

Python Intern — CodeAlpha

Apr 2025 – May 2025

- Developed backend applications using Python and OOP
- Built modular and maintainable systems
- Used Git/GitHub for collaboration

Certifications

- Python (Basic) — HackerRank Apr 2026
- Gen AI Academy — Google Cloud / H2S Sep 2025
- IIT Madras — Foundation Level in Programming & Data Science Sep 2025
- MongoDB Basics for Students Sep 2025
- Cisco Networking Academy — C Essentials 1 Jul 2025

- Infosys — Programming in C
- TCS iON Career Edge
- Salesforce AI Agent Workshop

Jun 2025
Nov 2025

Achievements

- Rank 13 — National Level Mathematics Olympiad (Level-II)
- Participant — FedEx SMART Hackathon, IIT Madras
- Participant — Adobe India Hackathon

Education

B.Tech — Computer Science Engineering

2024 – 2028

Arya College of Engineering & IT

BS — Data Science & Applications

2024 – Present

IIT Madras

Coursework

Data Structures • Algorithms • OOP • DBMS
